

EYAD ELFAR

AI Engineer | LLM, Agentic & Production AI Systems

Dubai, UAE | +971589794339 | eyadamen588@gmail.com | [linkedin.com/in/eyadelfar](https://www.linkedin.com/in/eyadelfar) | github.com/eyadelfar
eyadelfar.github.io

PROFESSIONAL SUMMARY

AI Engineer who went from analyzing data to owning production AI platforms in under two years. Designs LLM, agentic, and automation systems that hold up in live workflows, equally comfortable with RAG architecture and the business case behind it. Known for turning model work into outcomes non-technical stakeholders can act on, from a sub-500ms sales copilot to automation that removes 75%+ of manual effort.

SELECTED HIGHLIGHTS

- **Trajectory:** moved from Data Analyst to production AI Engineer in three roles, with scope growing from reporting to owning end-to-end AI platforms.
- **Approach:** builds for production rather than demos, with systems measured in sub-500ms latency, hours-to-minutes cycle times, and 75%+ less manual work.
- **Range:** delivered production AI across real estate, fintech, retail, and education, adapting quickly to each domain's constraints.

PROFESSIONAL EXPERIENCE

AI Engineer

May 2025 – Present

Baron & Cabot • On-site, Dubai, UAE

- Owned the design and launch of a real-time sales copilot (FastAPI/React) that streams live call transcripts over WebSockets and returns sub-500ms guidance via Vertex AI, RAG, and semantic caching, giving agents live objection handling and property recommendations mid-call.
- Shipped an ElevenLabs voice agent that runs 6,000+ outbound qualification calls daily, books meetings with real-time availability, and auto-enriches the CRM with budget and qualification notes, booking 100+ meetings in its first month at a fraction of a human coordinator team's cost.
- Replaced a fragmented, multi-tool process by engineering a Google Cloud Run platform that automates 30+ stages of the property lifecycle, using Gemini Vision for document verification, bidirectional CRM sync, and an automated Twilio WhatsApp outreach bot.
- Removed hours of manual call review by deploying 21+ n8n workflows that run transcripts through Gemini to auto-generate scored HTML/PDF coaching scorecards, giving managers consistent, on-demand performance insight.
- Strengthened lead prioritization by building Python pipelines with incremental HubSpot syncs feeding a 14-factor ML lead-scoring model, and shipped engines for natural-language Meta Ads querying and 10-year ROI modeling to speed sales decisions.

Data Scientist

Apr 2024 – Apr 2025

MENRV.AI • Remote, UAE

- Launched a vLLM-powered merchandising suite for Shein and Myntra, delivering virtual try-on at 90% fit accuracy and cutting content creation time 80% to accelerate catalog production at scale.
- Collapsed deck creation from hours to under 5 minutes by building an AI presentation assistant that auto-generates full decks with custom imagery and exports to PowerPoint and Slides.
- Cut reporting time from 8 hours to 5 minutes by developing a financial forecasting engine (BiLSTM and Prophet, 20+ technical indicators), freeing analysts for higher-value analysis.
- Expanded the product's global reach by shipping a multilingual TTS system across 50+ languages, increasing accessibility fivefold.

AI Engineer (Contract)

Nov 2024 – Apr 2025

[NEOMI](#) • Remote, Egypt

- Designed and owned the core AI engine for an AR learning platform serving 15,000+ students, pairing handwriting recognition with an LLM-based evaluator that reached 92% alignment with educator benchmarks.
- Cut educator debugging time 75% by introducing CI/CD pipelines and self-updating analytics dashboards that stabilized model deployment and pedagogy alignment.
- Scaled the platform to 20 German schools and built assessment analytics with interactive score charts, lifting educator insight accuracy 85% and reducing grading time 60%.

AI Instructor

Dec 2023 – Mar 2024

[iSchool](#) • Hybrid, Egypt • Concurrent with B.Sc.

- Taught Python and AI to 70+ students across 64 sessions, coaching 36 to build and present working RL-driven games, and designed hands-on curriculum with Scratch, Arduino, and PictoBlox.

Data Analyst

Sep 2023 – Dec 2023

[e-finance](#) • On-site, Egypt • Contract, extended to project completion

- Analyzed 500M+ transaction records to surface 10+ behavioral insights in digital payments that directly informed executive decision-making.
- Doubled data throughput by optimizing ETL pipelines with no latency increase, and automated monthly management reporting to improve clarity and turnaround.

SELECTED PROJECTS

- **Gamers' Mental-Health NLP Classifier:** 94% accuracy across 5,000+ posts with SHAP explainability; earned a Kaggle Bronze Notebook Medal. [Notebook](#)
- **Cigarette-Butt Detection, YOLOv8:** 92% real-time detection accuracy with dashboard integration; OpenCV, FastAPI, Docker. [Code](#)

CORE SKILLS

AI / ML: LLMs, RAG, Agentic AI, Multimodal AI, NLP, Prompt Engineering, Fine-tuning (LoRA/QLoRA), Distillation, Quantization, Reinforcement Learning, Computer Vision

Frameworks: PyTorch, TensorFlow, Scikit-learn, Hugging Face, LangChain, LangGraph

Engineering: Python, SQL, FastAPI, Flask, REST APIs, GraphQL, WebSockets, React, JavaScript, Docker, Kubernetes, CI/CD, Git, Nginx, Redis, RabbitMQ

Cloud & MLOps: Google Cloud (Vertex AI, BigQuery, Cloud Run, Cloud SQL, Cloud Build), MLflow, Airflow, Kafka, Snowflake, Redshift

Data: PostgreSQL, MySQL, MSSQL, ETL pipelines, data visualization

Automation: n8n, Twilio, Selenium, BeautifulSoup, Scrapy

Languages: Arabic (Native), English (Professional)

EDUCATION

B.Sc. in Computer Science & Artificial Intelligence

Sep 2020 – May 2024

[Helwan University](#) • Egypt • Grade: Excellent with Honors

Thesis: One-shot attendance system using YOLO, RetinaFace, and MTCNN for face detection and recognition, with data integrated into MySQL and MS SSIS for live dashboard reporting.

CERTIFICATIONS & HONORS

- **McKinsey Forward | Natural Language Processing Specialization** • Coursera, 2024
- **Machine Learning Nanodegree** • Udacity & EGFWD | **Data Science Diploma** • Orange Digital Center, 2023
